General Webinars

**Get Connected with Applied Software:**
**Make the Most of Your Subscription to Autodesk**
Applied Software is here to be your partner helping educate and streamline your workflows as much as possible. Come join us for this free informative webinar on the tools available to you that will help you and your company harness the power to go further.

Learn about tools like:
- **URTSA:** Unlimited industry leading technical support with services you've come to expect.
- **CADLearning:** Free offering to all clients who subscribe to Autodesk. CADLearning is the largest online video library of expert Autodesk training and testing resources.
- **LiveLab Learning:** Distance learning at its best. A virtual classroom experience, where students can listen, interact and learn from veteran Application Engineers is real time from anywhere in the world.
- **Services:** Learn about how to get 30 day install help, coaching/mentoring on specific projects, BPAs, block time and more.
- **Autodesk:** Gain important contact information and instructions on activation, registration, downloading and transferring of a license/address change.
- **Applied Software:** Our leading industry experts that make up our technical services team and knowledgeable sales team.
- **Educational Resources:** Blogs, white papers, case studies, webinars and more.

Wednesday, November 16  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**CADLearning:**
**Getting Started with the Basics**
Applied Software is providing its customers that subscribe to Autodesk with CADLearning, a best-in-class on-demand learning environment for the latest 3D design, engineering and entertainment software from Autodesk. Join us to learn the basics of CADLearning. In this session, we will review how to view courses, take quizzes, download exercise files, use curriculum builder and manage your profile.

Wednesday, January 25  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

* REGISTER & ATTEND EACH WEBINAR TO BE ELIGIBLE FOR A $25 GIFT CARD. A WINNER WILL BE AWARDED AFTER EACH WEBINAR*
Architectural & Engineering Webinars

**BIM for Commercial Interiors Design**
Test-fits for commercial interior design can leverage the capabilities of BIM. In this session, we'll examine how you can use Revit Architecture to explore, create, and document an interior design project. We'll illustrate the opportunities to use Revit Architecture for effective space planning, area analysis, presentation, and construction documentation. We'll also explore incorporating design sketches and DWG files into the workflow.

**Architectural & Engineering Webinars**

**Wednesday, November 30 | 12:30 pm - 1:30 pm EST | REGISTER HERE**

**The Cloud Made Seamless:**
* How Panzura Can Improve Collaboration and IT Simplification
Want better collaboration? Want to enable applications to work as well across offices as at a single location? Panzura provides all that plus allows you to drive the consolidation of storage, WAN optimization and computer into the cloud. Join us for this complimentary webinar to see how Panzura can improve collaboration and IT simplification.

**Tuesday, December 13 | 12:30 pm - 1:30 pm EST | REGISTER HERE**

**BIM for Commercial Interiors Design**
Test-fits for commercial interior design can leverage the capabilities of BIM. In this session, we’ll examine how you can use Revit Architecture to explore, create, and document an interior design project. We’ll illustrate the opportunities to use Revit Architecture for effective space planning, area analysis, presentation, and construction documentation. We’ll also explore incorporating design sketches and DWG files into the workflow.

**Architectural & Engineering Webinars**

**Wednesday, November 30 | 12:30 pm - 1:30 pm EST | REGISTER HERE**

**FenestraPro Premium 3.0 for Revit:**
* Optimize Facade Design and Performance
Discover how to enhance your workflow and design better performing buildings using FenestraPro Premium for Revit Version 3.0. This version includes additional functionalities like supporting project environment modeling alongside conceptual design environment to iterate designs from concept to detail stages.

**Wednesday, January 11 | 12:30 pm - 1:30 pm EST | REGISTER HERE**

UPCOMING WEBINARS

Manufacturing Webinars

**AutoCAD Electrical: Competitive Edge for Control Engineers**
Haven’t heard of AutoCAD Electrical? Then, this presentation is for you. During this free webinar, we will provide an overview of the functionality and efficiency AutoCAD Electrical provides for electrical controls design. We will lightly cover the project manager, basic schematic creation, panel layouts, and reporting tools. If you are new to AutoCAD Electrical, or just getting started, you don’t want to miss this discussion.
Tuesday, November 1  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**The Evolution of Fusion: Where Are We Now?**
When it comes to cloud-based solutions for the product design & manufacturing industries, Autodesk is in constant motion. Fusion 360, for example, is on a six week development cycle, which means new features and functionalities are being implemented in an unprecedented pace. In addition, the Autodesk cloud offerings have expanded to include Fusion Team and Fusion Lifecycle. In this webinar, we will explore the latest workflows in the evolution of the Fusion offerings. These workflows include 3D CAD, CAM, and CAE tools, product lifecycle management, and the viewing, sharing and reviewing of over 100 2D and 3D file formats.
Tuesday, December 6  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**Steel Supports for Plant 3D Bundle: The Additional Support You Need**
Need additional AutoCAD Plant 3D Auxiliary Steel Supports, Hangers and Clamps but don’t know where to go? Applied Software has developed them for you. Gone are the days of stick-building supports with steel shapes and exploding them to clean up before converting them to intelligent supports to insure they appear on your isos and reports. Come learn about the Steel Supports for Plant 3D Bundle.
Tuesday, January 10  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

UPCOMING WEBINARS

Construction Webinars

**Hilti Button for Firestop: BIM & Firestop Easier Than Ever**
With the Hilti Button for Firestop, AEC professionals can populate Building Information Models with appropriate firestop components easier than ever, through automated clash detection and product selection. The Hilti Button for Firestop is an add-in for several Autodesk applications such as Revit, AutoCAD MEP, Fabrication CADmep and Navisworks Manage.
Wednesday, December 7  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE
Wednesday, January 18  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**BIM 360 & Fabrication Hangouts**
Come hangout with the Construction and Fabrication Experts to learn some tips, industry trends and some more productive ways to finish your projects ahead of schedule, below budget and with fewer errors.

**November BIM 360 Hangout:**
*Sorting & Filtering in BIM 360 Field*
One of the more helpful ways to organize and view information in BIM 360 Field is through the use of the Sort & Filter buttons. We’ll show you how to setup specific filters, sort data, and how to sort & filter on the iPad.
Thursday, November 3  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**December BIM 360 Hangout:**
*What’s New with Daily Updates*
Learn what new enhancements have been implemented into Daily Updates and how these new features can benefit your project team.
Thursday, December 14  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

**January Fabrication Hangout:**
*In’s, Out’s and Unconventional Use of the Product Information Editor*
Join ASTI’S FAB Team as we discuss navigating through the Product Information Editor to learn the basic picks and clicks. Additionally, we will discuss some unconventional uses and practices within the Product Information Editor.
Thursday, January 26  |  12:30 pm - 1:30 pm EST  |  REGISTER HERE

* REGISTER & ATTEND EACH WEBINAR TO BE ELIGIBLE FOR A $25 GIFT CARD.
A WINNER WILL BE AWARDED AFTER EACH WEBINAR*

Civil Webinars

**Revit Integration with Civil 3D**
Exporting Revit Families to AutoCAD Civil 3D extension is designed to transfer any solid Revit® Structure family into a AutoCAD® Civil 3D® drawing. The Integration with AutoCAD Civil 3D extension is designed to transfer the data related to the topography, the road and the bridge elements between the Revit® and AutoCAD® Civil 3D. This webinar sheds the light on the roundtrip workflows between architects, structural engineers on one hand, and civil engineers.
Thursday, November 10 | 12:30 pm - 1:30 pm EST | REGISTER HERE

**Utilizing the AutoCAD Civil 3D Geotechnical Module for Geotechnical Data**
During this webinar, the creator of the Geotechnical Module, Keynetix, will show you how quickly you can visualize borings in context of your site, create multiple strata surfaces and generate geotechnical profile views containing boring log strips in only a few minutes—this is work that would normally take many hours. We’ll also demonstrate how the Geotechnical Module can link into HoleBASE SI as part of a central geotechnical data management system, which can dramatically speed up workflows and integrates geotechnics into BIM.
Thursday, December 1 | 12:30 pm - 1:30 pm EST | REGISTER HERE

**Work Like an Engineer with the Newest InfraWorks 360**
The new InfraWorks 360 software brings civil engineering professionals closer to working with this tool just as they were trained to—like engineers. Now, you’ll find capabilities with enhanced accuracy and precision. During the webinar, we’ll cover the new “Views” menu, view terrain contours, unit configuration, and cross section views. We’ll also show you other helpful tips like how to modify maximum superelevation rate and runoff parameters for the entire component road in the Stack. Don’t miss out on this informative discussion.
